Date of birth: 27-01- 2000

ABOUT ME

Hello there, I am a full stack software engineer to be. Currently studying at Fontys ICT on my way to a bachelors degree. Next to that, I'm working as a full stack web developer at Limax B.V.
I've chosen software engineering, because I've been experimenting with writing software since high school. After starting my studies, this interest has turned into a hobby and personal need to understand, know more and get better at what I like doing.

I am a social person, a team player, goal oriented and very structured. I like to get things done, properly! Structure makes a developers life easier, thats why I love it so much. I am always open to converse and share views in order to find the most suitable solution/approach for each situation.

Although I only have 3 years of experience under my belt, I am able to understand complex concepts due to my habit of always wanting to know more and my willingness to have a open conversation about a wide range of topics (both IT and non-IT related).

EDUCATION

2020 - present
